APPLICATION OF VOLUME INCENTIVE RATES
(Volume/Per 12-Month Period for 10 Years)

1. Applies to Volumes shipped under this tariff in a 12-Month period beginning on the commencement date of the agreement between Shipper and Carrier (“Agreement”), and thereafter in each successive 12-Month period for 10 years (“Agreement Term”).

2. No Volumes for any 12-Month period shall be carried forward into a subsequent 12-Month period to satisfy the Annual Volume Commitment for the subsequent 12-Month period.

3. The “Annual Volume Commitment” shall be 20,075,000 Barrels from a mutually agreed upon Texas City, Texas refinery origin to the destinations. Commitment Shipper will pay a deficiency charge of [U]19.82 cents per Barrel on deficient Barrels. Deficient Barrels for the Annual Volume Commitment will be determined by subtracting the total Volume from a Texas City, Texas refinery origin transported through Carrier’s system to the destinations from the Annual Volume Commitment. Amounts paid as deficiency for the Annual Volume Commitment each 12-Month period will be considered by Carrier as prepaid charges and will be credited to commitment Shipper at the rate of [U]19.82 cents per Barrel against transportation charges on Volumes that commitment Shipper may elect to ship from Texas City, Texas through Carrier’s system to the destinations. At the end of the Agreement Term any prepaid charges remaining credited to commitment Shipper shall not be reimbursable, except that, for a period not to exceed 12 Months immediately following the Agreement Term, commitment Shipper has the right to use that credit of one half of the prepaid rate per Barrel against the transportation charges set forth above in this rate summary on product shipped by Shipper under Carrier’s Texas City, Texas to the destinations tariff as long as any of the prepaid charges have not been utilized. Carrier, however, shall be under no obligation to reimburse Shipper for any such prepaid charges remaining at the expiration of 12 Months following the Agreement Term.

4. If in any Month a Shipper cannot ship the Volume it has nominated due to proration, then that Shipper shall be credited in such Month, for the purpose of qualifying for the incentive rates, with the lesser of (a) the number of Barrels nominated in such Month by the Shipper or (b) the average of the number of Barrels shipped by the Shipper in the previous three Months.

5. If a Shipper fails to ship Volumes in the 12-Month period as a result of Carrier’s inability to provide service, then the Volumes under the “Application of Volume Incentive Rates” for the 12-Month period shall be reduced prorata on a day-for-day basis for each day that Carrier was unable to provide service.

6. Commitment Shipper’s Transmix, and all charges related thereto, will be handled as specified in Carrier’s Texas Intrastate Tariff No. 122.4.0, and supplements thereto or successive issues thereof.
